Contents

Original Papers
Simultaneous planning and action: neural-dynamic sequencing of elementary behaviors in robot navigation
Erik Billing, Robert Lowe and Yulia Sandamirskaya

A neural model of binocular saccade planning and vergence control
Wasif Muhammad and Michael W Spratling

Knowledge acquisition with forgetting: an incremental and developmental setting
Fernando Martínez-Plumed, Cèsar Ferri, José Hernández-Orallo and María J Ramírez-Quintana

Integrating learning by experience and demonstration in autonomous robots
Paolo Pagliuca and Stefano Nolfi

Review
Economic drivers of biological complexity
Steve Phelps and Yvan I Russell
